

Architectural and construction related adaptation of classrooms located at Kindergarten no. 6 and 12 in Gniezno together with land development

Project description:

The project was devoted to the reconstruction and partial reconstruction of the existing facilities. The objective was to create new places in kindergartens no. 6 and 12 suitable for 3-4-year-old children.

In case of kindergarten no. 6, one reconstructed the ground floor of the building, located at ul. Wiosenna 7 and changed the manner of using the premises. Previously, a part of the ground floor was used as a day room. There were 3 units in the kindergarten. As a result of the project, there is one new, additional unit. The aforementioned unit can accommodate up to 15 children. In order to create the discussed unit, one had to adapt the living quarters and reconstruct the unit located on the ground floor (adaptation aimed at meeting hygiene and sanitary standards, fire protection regulations, adaptation aimed at meeting the needs of individuals with disabilities). New premises were created in the building of kindergarten no. 6: a hall, a cloakroom, toilets.

Kindergarten no. 12 – one changed the current location of the kindergarten. One adapted the ground floor of the post-barracks building located in Gniezno - ul. Pocztowa 11 (the Junior High School no. 2 building) to create three new kindergarten units for 3 and 4-year-olds (for a total of 75 new children). There are seven rooms equipped with sanitary facilities, a sanitary facility for employees, a break room and a food distribution room, an elevator for meals and a washing-up room in the new location of kindergarten no. 12. Moreover, one developed the area for the playground around the building.

Beneficiary: the City of Gniezno
