

Developing the potential of Collegium Da Vinci to provide specialist services aimed at enterprises by creating infrastructure in the area of creative technologies

Project description:

The aim of the project was to develop the potential of Collegium Da Vinci by creating a venue in Poznan for people and companies from the creative industry, where they could comprehensively implement projects at the highest level. The project included carrying out construction works, as a result of which new infrastructure was created for purposes related to the project, the purchase of specialist equipment, the purchase of intangible assets and legal equipment, and the furnishing of premises. As a result, one of the largest facilities in the country operating named eNStudios was created.

The studio was constructed on a separate foundation slab and acoustically separated from the rest of the building so that it would not transmit vibrations. For the purpose, very thick walls were used, a heavy ceiling was installed, and mineral wool was placed between them. The entire space of the studio was divided into 3 zones:

- a recording studio – the audio space enables recordings of bands, soloists, voice-overs, podcasts, film sound and post-production. The studio consists of several spaces, each dedicated to different projects, differing in acoustics, size and equipment.
- a photo studio – for photo sessions and film productions. The studio has a cyclorama with a balcony for any arrangement.
- a Motion Capture studio – a gaming space dedicated to game designers and producers, and an almost 300-meter Motion Capture studio with equipment needed for scanning objects or VR production, as well as space for rent for various types of film, advertising and spot productions.

The facility also offers office and coworking space: conference and workshop rooms, catering facilities, call boxes and a relaxation zone.

Beneficiary: Collegium Da Vinci

Programme:

WROP 2014+

Fund:

European Regional Development Fund

Total value of the project: PLN 33,388,868.62

EU contribution: PLN 17,333,950.49
